

I fully support the advice of others who recommended that you stick with the [WordPress.org](#) platform. While it may feel unfamiliar right now, the more you dedicate yourself to it and continue learning, you will soon find yourself in a place of complete comfort. Trust us on this, it's worth it.

In order to help you during the learning process, I share with you *WPBeginner tutorials and guides* which can greatly help you get started, with the various topics.

This is an excellent, *organized list of items* to get you started (28):
